The LevelSetup software is used to set the operating parameters and the settings of the MC-LEVEL meter. The data and settings are saved on disk on the PC.

Programming is performed via the serial port RS232 or RS485. The MC-LEVEL meter RS232 port is connected to the PC in the RS232 mode.

Minimum system requirements:

- Operating system: Windows 95, 98, ME, NT4, 2000, XP
- Computer: 100% Windows compatible with serial port RS232
- CPU: 200MHz or superior
